

Dear Donor,

For being able to be the recipient of the IBIA award in the second year again, I am deeply grateful for your generosity and selecting me. I am very pleased to be selected for this award as IBIA is a reputable international organization in the maritime industry. Singapore is known as a bunkering port and the presence of IBIA has made a significant impact in the local bunker sector as well.

I am a final year student in Nanyang Technological University pursuing Bachelor of Science in Maritime Studies. With this additional financial support, I need not worry about my school fees and am able to continue my education in the university and proceed to enter the working world and the maritime industry. Throughout my university years, I have tried my best to work hard and saw improvement in my grades gradually. Besides academic grades, I have always been seeking internships during holidays and term breaks to pursue greater learning opportunities. So far, I have managed to intern and learnt a great deal from companies in the chemical tanker trade and offshore support sector.

Receiving this award means a lot to me since it has helped to reduce my family's financial burden significantly. Thank you for honouring me with this bursary and your support is greatly appreciated.

With sincerest thanks,
Daphne Kow
